Evidence Checklist - Activity 10

Wellbeing Programme Management Review

[ ] Public facts are cited and separated from training assumptions.

[ ] Every scenario question is answered with evidence or a stated limitation.

[ ] The detailed procedure was followed and each checkpoint is recorded.

[ ] Owners, decision rights, dates and review triggers are explicit where applicable.

[ ] Acceptance test met: The review validates data, follows the logic model, separates implementation from outcome, analyses equity, names confounders, avoids causal overclaiming and gives component-level decisions with owners and review triggers.

[ ] The final recommendation states residual risk and the next validation action.
